## **Audit Assistance**

Wagner-Meinert, LLC provides assistance in all aspects of auditing. Some examples include:

### **A. Process Safety/Risk Management Compliance Audits:**

These audits are required at least every three (3) years. Wagner-Meinert, LLC can provide a complete auditing team which will analyze your program fulfillment of the required elements of a PSM / RMP program. In addition, the audit includes an analysis of the management system, a critical component to any safety program.

### **B. Ammonia Refrigeration Maintenance (ARM) Audits:**

The Ammonia Refrigeration Management Program requires a “Management Review”. Wagner-Meinert, LLC can provide a complete auditing team which will analyze your program fulfillment of the recommended elements of an ARM program.

### **C. OSHA and EPA Audit Assistance:**

When the inspectors arrive, it is imperative that you are prepared. An experienced PSM / RMP professional is invaluable. Mistakes made during interviews can result in hundreds of thousands of dollars in fines. Wagner-Meinert, LLC’s professionals can assist during and after the audit to assist in answering questions and locating information. Obviously, nothing can make a non-existent program look good. But the assistance of our experienced professionals have proven to reduce fines and help develop the spirit of cooperation necessary for a successful inspection.
